## **DETAILED ACTION**

### ***Claim Objections***

I. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Independent claim 2 is identical to preceding claim 1.

### ***Claim Rejections - 35 USC § 102***

II. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Guzowski et al., US No. 6,299,176 ("Guzowski").

i. Guzowski discloses a gasket (FIG. 2) having a flexible seal lip (77) continuously extending annularly along a circumferential portion of the gasket (FIG. 2). A tip part (97) of the seal lip (77) that projects beyond the opposed surface of the gasket is inclined ( $\alpha$ ) toward the circumferential portion of the gasket (FIG. 2).

Art Unit: 3676

ii. There is a clearance groove (81) that can accommodate the seal lip (77) formed on the opposed surface along an outer peripheral surface of the seal lip (FIG. 2).

iii. The bottom surface of the clearance groove is continuous through a curved surface (@ 101) to the outer surface to the outer surface of a root of the seal lip.

iv. The stress relief groove forms a curved surface (FIG. 2).

v. Examiner Note: The claims are being examined as they pertain to the subcombination of a gasket because the door mirror has not been positively claimed.
